

AMCiBIOTIN 0.04% Biotin Feed Premix

AMCiBiotin 0.04% delivers supplemental Biotin needed by intensively reared animals for optimal growth and performance. AMCiBiotin 0.04% is involved in the breakdown of amino acids and plays the role of a detoxifier of the animal. It is essential to the normal growth of bones and integuments.

BENEFITS:

Swine:

- Improves viability of piglets
- Higher litter weaning weights
- Shorter breeding intervals/recycling of sows
- Higher conception rates
- Less culling rates due to anoestrous
- Prevents cracking of hoof leading to better hoof conditions

Poultry:

- Improves hatchability of chicken and turkey eggs
- Increases percentage of saleable (broiler) chicks produced

COMPOSITION (per kg):

Biotin	400,000 mcg
Carrier	QSAD

INDICATIONS:

For the prevention of Biotin-responsive diseases such as encrustation (dry scaly skin), muscle atrophy and malformation of embryonic skeleton

DOSAGE AND ADMINISTRATION: 100-1000 g/ton of feeds

PACKAGING: 25 kg kraft bag
