"Sustainable Development In Animal Production"

AMCiCHELMIN **Chelated Mineral Premix**

More Stable, More Absorbable, And Saves Other Nutrients

AMCiChelmin is a blend of highly absorbable and pH-stable chelated minerals. It is designed primarily to prevent mineral deficiencies associated with intensive farming.

Chelmin C is fortified with chelated chromium to improve the overall production and reproduction parameters in animals.

Chelmin I is fortified with chelated iron to address the needs of intensively reared animals during the critical stages of pregnancy and growth.

AMCiChelmin C

COMPOSITION (per kg):

Chelmin Chromium.....	200 mg
Chelated Iron	17,250 mg
Chelated Zinc	8,250 mg
Chelated Manganese.....	7,500 mg
Chelated Copper	3,000 mg
Chelated Selenium	100 mg
Chelated Cobalt	100 mg
Carrier.....	QSAD

AMCiChelmin I

COMPOSITION (per kg):

Chelated Iron	17,250 mg
Chelated Zinc	8,250 mg
Chelated Manganese.....	7,500 mg
Chelated Copper	3,000 mg
Chelated Selenium	100 mg
Chelated Cobalt	100 mg
Carrier.....	QSAD

DOSAGE AND ADMINISTRATION: 0.5 - 1.0 kg/ton of feeds

PACKAGING: 25 kg kraft bag
